EDUCATION

University of Connecticut

Storrs, CT

Bachelor of Science in Computer Science

Aug. 2024 – May 2028

- **Relevant Coursework:** Data Structures & OO Design, Algorithms & Complexity, Cybersecurity, Applied Linear Algebra, Statistical Methods
- **Awards/Honors:** Connecticut Roberta B. Willis Scholarship

EXPERIENCE

AI Trainer

March 2026 – Present

Handshake AI

Contract

- Train AI systems to work more accurately across audio, visual, and text formats by providing structured feedback
- Audited and edited AI-generated captions for video media to fix translation and synchronization errors
- Refined AI-generated outputs to ensure high-precision data alignment and cross-modal accuracy

Nightstocker

June 2025 – August 2025

New London Commissary

New London, CT

- Developed time management, teamwork, and problem-solving skills through fast-paced, service-oriented work
- Supported daily operations in a high-traffic federal facility, maintaining accuracy in transactions and inventory management
- Handled customer assistance, and stock organization with efficiency and attention to detail

PROJECTS

AI Desktop Command Bar | *Electron, React, Node.js, Anthropic API*

June. 2026

- Built a floating overlay for Windows with a global hotkey, app launcher and AI chat interface, and real-time Claude API streaming.
- Engineered a clipboard manager supporting text, images, and copied files with persistent storage, thumbnail previews, and native paste
- Implemented Google Lens-style screen capture with DPI-aware cropping, smart 4-way panel positioning, and GPU compositing fix to capture video/GIF content

Premier League Match Outcome Predictor | *Python, Scikit-learn, Pandas, Random Forest*

May 2025

- Developed a data-driven prediction system using Python and Scikit-learn to classify Premier League match outcomes.
- Designed and implemented data cleaning pipelines with Pandas, handling missing values, encoding categorical data, and generating rolling averages and team performance indicators.
- Trained and optimized a Random Forest Classifier achieving 68% precision on held-out test data, evaluated with accuracy, precision, and cross-validation metrics.

Automated Weather Notification System | *Python, Open Meteo API, PushOver API*

Jan. 2025

- Developed a real-time weather notification system integrating Open Meteo API for weather data and PushOver API for mobile push notifications.
- Built automated scheduling, error handling, and data pipelines for a reliable daily notification experience.

Spotify Playlist Generator | *Python, Spotify API, GUI*

Dec. 2024

- Built a GUI-based application that generates personalized Spotify playlists based on user inputs including song title, artist name, and desired playlist size.
- Integrated Spotify's OAuth API to search for tracks and create playlists directly in the user's account.

TECHNICAL SKILLS

Languages: Python, C++, C, Java, JavaScript, SQL, Bash/Shell

AI & ML: Scikit-learn, Pandas, NumPy, Matplotlib, RLHF Workflows, LLM Evaluation, Adversarial Testing

Developer Tools: Git/GitHub, VS Code, Neovim, SSH, Linux/Unix Terminal, REST API Integration

Libraries: Scikit-learn, Pandas, NumPy, Matplotlib
